

# Moshe Israeli Memorial Symposium

Taub Building, Room 3, Technion–Israel Institute of Technology  
Thursday, February 9, 2012

## Program

- 10:00-10:30 Gathering and coffee.
- 10:30-11:30 Recollections and memories by the Israeli family and friends.
- 11:30-12:15 Amir Averbuch (Tel Aviv University)  
“High dimensional data processing via patch and multiscale data sampling through function extension”
- 12:15-13:00 Dan Givoli (Technion)  
“The ABC of ABCs (Absorbing Boundary Conditions)”
- 13:00-14:15 Lunch.
- 14:15-15:00 Eli Turkel (Tel Aviv University)  
“Acceleration methods for the Navier–Stokes equations”
- 15:00-15:45 Eran Treister (Technion)  
“A multilevel algorithm for sparse representation of signals”
- 15:45-16:00 Break.
- 16:00-16:45 Avram Sidi (Technion)  
“Recent developments in asymptotic expansions and variable transformations for numerical quadrature”
