

YAHOO!

Research & Hiring Event

We are happy to invite you to join us on our annual Yahoo Research day at the Technion.

Come take part in two fascinating science tech talks, dynamic round tables with our research scientists and engineers and enjoy a discussion about research, products and open positions.

Interested in a summer internship project, or a full time opportunity? Make sure you bring your CV and any questions you might have.

12:30-12:40 - Intro by Edward Bortnikov, Sr. Director, Research

12:40-13:05 - Anastasia Braginsky, Sr. Research Scientist. "Accordion: a Better Memory Organization in LSM Key-Value Stores". The talk is based on the paper at VLDB 2018 that describes an algorithm contributed to Apache HBase - a cloud-scale open source database project.

13:05 - 13:30 - Irena Grabovitch-Zuyev, Sr. Research Engineer. "Analyzing Machine Generated Mail". The talk will recap recent papers published at WSDM, CIKM and WWW that focus on automated clustering and extraction of data from machine-generated email.

13:30 - 14:30 - Round tables and blitz interviews with researchers from our teams: Text Mining and Search, Mail Mining, Semantic User Modeling, Ad Ranking, Scalable Systems, and Video
